

New **Phase 4 HPS™** **High Performance System**

Phase 4 HPS™ combines all of our best performing solutions into a new specification for the ultimate in high-speed, high-performance, rotary diecutting.

New elastomers with **Low Friction Interface™** for advanced stripping of scrap at full speed.

New **ScrapBlaster™** profiles for positive trim removal.

Uniform rule heights reduce machine vibration enhancing press stability.

Optional **MicroTrim Plus™** for the ultimate in trim ejection and trim width reduction.

Optional **LinerGuard™** for reduction in liner cracking.

Another **Knock-Out™** Product from Container Graphics
