

# ProFlex<sup>TM</sup>

## ProFlex<sup>TM</sup> cushion plate mounting material

### Unique Construction

ProFlex2 has quick rebound characteristics and high resistance to compression set, which eliminates the highs and lows associated with lower quality plate cushions.

### Superior Performance

ProFlex2 enables printers to achieve less fluting, consistent ink coverage and reduced dot gain on corrugated board.

### Supported

It's available with a .010" thick polyester or a .030" high quality PVC carrier sheet. It's unique construction and precise engineering allow for easy removal of the cushion material.

### Unsupported

ProFlex2 is also available with an adhesive coating, engineered to give the right amount of grip.

ProFlex plate mounting cushion - another example of how Container Graphics is committed to helping our customers break new ground in flexographic printing. Call today for more information.

- Supported on .030 PVC on .010 polyester
- Unsupported with special adhesive
